

David Jordan

Staff Instructor

David Jordan has been a police officer for a major department in Arizona since 2001. He served several years as a patrol officer before being selected to the Firearms Training Unit. While serving at the FTU David conducted handgun, shotgun, and rifle training, and trained both recruits and in-service personnel. David now serves on the department's Safety Unit as a Safety Officer responsible for the safety and training of the department's Dive Team, WMD / PPE program, and SCBA program. David still serves as an adjunct firearms instructor.

David created his Department's EMS program and is currently the coordinator for it. This program adapted national recognized training within the EMS community for law enforcement. David is responsible for obtaining funding and conducting training for first responders and other specialty units. David has worked to develop a partnership with three major departments within his state to create a law enforcement specific pre-hospital program based out of a level one trauma center.

David is a certified paramedic with the state of Arizona and national registry, NREMT. David is a NAEMT instructor and is certified to teach PHTLS, TCCC, LEFR, and other related courses. David is also working to develop a K9 care course with the assistants of a local Vet.

David has worked to improve safety on the range with lead blood testing, noise monitoring, and dust control. He has taken his medical experience and adapted it to meet the need of the firearms instructor. David has developed drills for instructors to train for the worst case scenarios, serious injuries on the range or in the shoot house. David has also helped develop range trauma kits that make sense for the instructor to use in the unfortunate event someone is seriously injured.

David created the *Live-Fire Training Casualty Care Course* as one of instructor development courses for NLEFIA.

Certifications:
